

SOLAREXPO 2008

From May 15th to May 17th, Verona fair will host SOLAREXPO, the international exhibition and conference on renewable energy and distributed generation.

The main business sectors are:

The solar system:	thermal, photovoltaics
The green planet:	biomass, biogas, liquid biofuels
Microgen & Polygen:	distributed cogeneration, trigeneration water
Wind and fire:	hydropower, windpower, geothermal energy
Ecomove:	alternative vehicles and fuels
Hyenergy:	hydrogen and fuel cells
R&D, consulting, services, ESCOs, carbon trading	
Technical publiciting, software, sector associations	

The 9th edition of the event has recorded an unprecedented result: almost 500 direct exhibitors and represented companies are going to exhibit their products at SOLAREXPO making it one of the top renewable energy trade fairs in Europe:

- 572 exhibitors and represented companies (+57% with respect to Solarexpo 2006)
- 25 represented European and Non-European countries
- 34% foreign exhibitors
- 31,700 sqm total exhibition area covered (+104%)
- 40,600 visitors (+86%)

The exhibition will be accompanied by a rich conference programme where experts will discuss the potential of the new Italian energetic plan aimed to incentive the use of "green" technologies.
